

APGO 2010 Medical Educational Endowment Fund Awardees

The Association of Professors of Gynecology and Obstetrics (APGO) Medical Education Endowment Fund Grant Program was established in 2009 as a new initiative of the association. This program provides financial support to stimulate research and innovations in health science education. Small grants (up to \$15,000 per project) are made to APGO members who submit a written proposal and budget for a project that strives to improve education by innovative approaches. Projects demonstrating a direct, measurable, positive impact on medical student education are considered most competitive for the award.
